- an in-depth front-end web development course, covering essential technologies and tools for building responsive and interactive web applications. Gained practical experience through hands-on projects and assignments.
- Technologies played with : **HTML & CSS/bootstrap , JavaScript, Angular, Reactjs**

SKILLS

Languages : Java, JavaScript, TypeScript, HTML, CSS3

Frameworks : React, Vue, Angular, Thymleaf, TailWindCSS

Libraries : Redux, Axios, Zod, react-hook-forms ... etc

Database : SQL (MySQL, Oracle), noSQL (MongoDb, Firebase)

PERSONAL PROJECTS

Spring Boot CRUD Application (06/2023 - 07/2023)
- Developed a full-featured CRUD application using Spring Boot, designed to manage [specific type of data, e.g., employee records, product inventory, etc.]. The application includes RESTful APIs for creating, reading, updating, and deleting records.

Netflix Clone App
- Developed a Netflix Clone web application using React for the front-end, Firebase for backend services, and The Movie Database (TMDB) API for fetching movie data. The application allows users to browse, search, and watch movie trailers. It includes user authentication, dynamic content display, and responsive design.

Personal Portfolio
- Built & deployed a visually appealing portfolio website with React.js, integrating project showcases, resume and a contact form.
